

INTRODUCING Tahitian-Breeze Portable Misting Fans by

"Never has such a small, sleek and portable unit been introduced to this industry at such an affordable price and with so much power -- it blows everything else out of the water!"

*Dave Shank, President
Cool-Off, LLC*

PORTABLE MISTING FAN KEY FEATURES

- 10-gallon self-contained water reservoir
- 1,000 psi high-pressure misting pump
- 4 nozzle stainless steel misting ring
- Adjustable height option
- 18" oscillating fan with 35-degree tilt function
- More than 8,000 cfm of air movement!

Finally a high performance portable misting fan at an unbeatable price!

Introductory "MAP" pricing for authorized dealers and resellers

\$1,695 USD

Our Tahitian-Breeze Portable Misting Fan cools the air up to 30 degrees for 3 to 6 hours and without any need for a connection to a hose.

Like most, this mister is designed and manufactured to cool virtually anything ... from your backyard to a restaurant patio to industrial locations.

Like none, our 3-speed, 8,000 cfm (cubic feet per minute) unit comes equipped with the latest bells and whistles, including a high-pressure misting pump, 10-gallon water tank and the misting industry's ONLY 18" outdoor-rated oscillating fan. In fact, it packs a punch comparable to 24" models – but with far less noise and space! An upgraded, timer-operated unit can be provided for an additional fee.

Assembly is simple. Unlock the wheels, attach the fan head, fill with water and plug into a power source.

Then sit back, relax, and let the Tahitian's cool mist revitalize your mind, body and soul!

**WHAT IS MAP PRICING?

MAP, or Minimum Advertised Price is a voluntary agreement that all legitimate manufacturer authorized retailers enter into with their authorized U.S. supplier, usually the manufacturer, and in some cases, the official U.S. distribution arm designated by the manufacturer. According to such agreements, retailers can usually sell MAP-restricted items for any price they choose, but may not display in any print or online advertising a price below the Minimum Advertised Price.

Dealers that do not abide by requested pricing policies are typically cut off from such products, not to mention post-sale service.
